August 2021 – Present

*The University of Texas at Arlington*

*Arlington, TX*

- Responsible for Teaching Students, conducting exam review sessions, proctoring, grading exams, and guiding students on projects and coursework.
- Tutored more than 500 students with their doubts and queries via one-to-one sessions

## PROJECTS

**AVID** | *Python, GANs, cv2, ARUco, ArduPilot*

November 2022 – April 2023

- AVID - Advance Vision Interactive Drone: 3rd prize winner among 53 funded engineering research projects.
- Artificially intelligent robot companion drone that utilizes computer vision to assist visually impaired individuals.

**AI-Interviewer** | *Python, Flask, JS, Firebase, TTS, D-ID API*

May 2023 – Present

- AI-Interviewer is a tool designed to help job seekers practice for interviews like a real-life interview experience.
- Can save time and money for companies in the pre-screening interview process making it faster, reliable, and provides better feedback than traditional methods

**Readme.ai** | *Python, Flask, GitHub API, OpenAI API, Vector Database, Stripe*

July 2023 – July 2023

- An AI tool that analyzes GitHub repositories, creates short summaries, converts them to vector embeddings, and maps them to a multi-dimension vector space to generate Readme files for users who don't have one.

**AI Law Assistant** | *React, Firebase, OpenAI API, Fine tuning*

June 2023 – June 2023

- A rights awareness tool guiding individuals to fight against fraud, and injustice, file complaints, and understand applicable laws in various crime scenarios. Free for all users, including Police, lawyers, and the public.

**Shop'n'Split** | *Java, Kotlin, AWS, Supermarket APIs, OCR*

September 2022 – December 2022

- Developed an AWS-backed full-stack android app that recommends smart choices of groceries from a list of stores.

## CERTIFICATIONS

**AWS Certified Cloud Practitioner**

July 2022

**AWS Solution Architect Associate**

Aug. 2023

**Cloud Architecture: Advance Concepts**

September 2022
